Important Dates

- Last date for receiving filled-in registration form along with DD - 12th January 2017.
- Intimation regarding selection (through email only) - 14th January 2017.
- STTP from - 18th to 22nd January 2017.

About the Workshop

This Dynamic Web Design with PHP, MySQL and JAVA Scripts training course will give you a working understanding of these important technologies and show you how to use them to create your own impressive websites. When used in combination, there simply isn't a better way to construct sites that involve complexity, large volumes of data, and the flexibility to make adjustments and changes over time. This course goes step by step through the basics of each technology, and then gradually shows you how to build the necessary components and underlying framework of your site. It goes through installation of PHP and MySQL technologies on your local machine as well as hosted servers, explains basic tags, commands and constructs, and helps you to build and work within a solid back-end database. STTP also highlights how to use CSS and JavaScript to create the visual style and added functionality for your pages.
